

Nactarome NV is a European producer of flavours, hydrolysed vegetable proteins and savoury blends for the food industry. In addition to attention to product quality and food safety, Nactarome NV also wants to contribute to sustainability.

To continuously improve our sustainability development, we use 2 platforms.

1) SEDEX

The Sedex platform helps us to manage, assess, and report on sustainability performance. We are audited every 3 years by a 3rd party auditor for a SMETA 4-pillar audit. This entails following items:

- Labour standards
- Health and safety
- Business ethics
- Environment

Companies that are also member of Sedex, can view more information on the Sedex website. (Nactarome NV registration number S000000066070 & site number P000000142381).

2) ECOVADIS

Ecovadis is an independent organization to guide us in our pursuit by assessing and managing our sustainability practices on following items:

- Environment
- Labour and human rights
- Business ethics
- Sustainable purchasing

Ecovadis compares our results with similar companies all over the world and provides us with actions to improve our efforts on those issues. Our Ecovadis EVID number is UL710566.

On special request we can send our “Nactarome NV code of conduct” or more information on our Ecovadis scores.

Thierry Waeyenbergh  
Managing Director
